Precision designed coil storage cabinet featuring Corian® solid surface touchpoints, laminate or thermofoill components and patented non-ferrous construction for complete patient safety and compatibility with all magnetic imaging systems. Seamless, bleach cleanable Corian® surfaces are Greenguard Certified to resist the growth of viruses, bacteria and mold to support the highest infection control standards and reduce the risk of Hospital Acquired Infections (HAIs). Corian® surfaces also resist dents, scratches, chipping and eliminate the risk of delamination, commonly associated with traditional casework for superior life cycle. The matte Corian® surface finish reduces glare and reflections to support a calming patient environment. Laminate and thermofoil components are available in a choice of colors and wood grain styles, providing greater design flexibility and a more budget friendly alternative to our Magnaguard Corian® Coil Cabinet. Available in standard and custom sizes, configurations and all Corian® colors to complement any space.
