Cleaning Techniques & Agents

With regular care and maintenance, your Futrus® products will provide a lifetime of service. The instructions for the care and maintenance of Futrus® products are provided as a guide. No warranty is implied since results may vary.

ROUTINE CARE

With simple care, Corian Quartz will retain its appearance. Simply wipe down the surfaces with damp cloth or paper towel and, if necessary, a small amount of non-bleach, nonabrasive cleaner. It is very important to wipe the surface completely dry after spills and cleaning. Leathered finishes are more prone to showing signs of daily use and residual oil or other liquids may create a darker appearance. More frequent cleaning is recommended. Clean spills promptly.

CLEANING

For stubborn or dried spills Use a non-abrasive cleaning pad such as a white 3M Scotch-Brite™ scrub pad coupled with Formula 409 Glass and Surface Cleaner or a comparable cleaning product.

GREASE

Use Greased Lightening or a comparable degreasing production to help remove the grease from the surface. Follow the cleaner manufacturer's instructions for use. Rinse and wipe completely dry after cleaning. Difficult Spills and Materials Materials that harden as they dry (such as gum) are especially tenacious. Remove these by gently scraping away with a plastic putty knife.

DO NOT USE WAX OR POLISH

USE CAUTION WITH BLEACH

Casual exposure to diluted bleach will not damage Corian Quartz. Avoid using cleaners that contain high concentrations of bleach. Always follow the cleaner manufacturer's use instructions and exercise proper care when handling and storing any cleaning products.

AVOID HIGH-PH CLEANERS

PERMANENT MARKERS

First clean the surface as outlined in the Routine Care. If the stain persists, moisten a cloth with Goo Gone, or a comparable product, and rub it into the stain. Rinse thoroughly with warm water and remove and residual cleaner.

KEEP SOLVENTS AND POWERFUL CHEMICALS OFF THE QUARTZ

PREVENTING OTHER DAMAGE

Be sure to follow these guidelines to help you prevent permanent damage to your Corian® Quartz. Avoid getting strong chemicals, such as paint removers, oven cleaners, furniture strippers containing trichlorethane or methylene chloride, etc., on your Corian® Quartz. If a spill does occur, promptly flush the surface with water to fully rinse off the chemical.
